

Oil and Gas Field Facilities Include;

Hydraulic Process Analysis

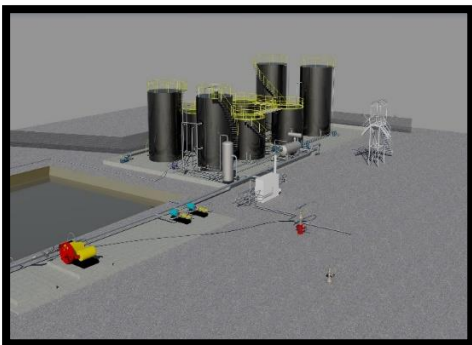

- Gathering Line Network and Station Analysis
- Hydraulic Calculations
- Heat & Material Balance
- Flash Calculations
- Preliminary Sizing of Piping and Instruments

Pressurized Vessel Design & Analysis

- Vessel Design and Analysis
- Saddle, Leg and Skirt Design
- Wind and Seismic Analysis

Storage Tank Design & Engineering

- API 650
- TS 12285-2
- Mechanical, Construction and Instrumentation Calculations
- Manufacturing Drawings

Oil & Gas Field Equipment Design & Engineering

- II & III Phase Separator
- Flare Stacks
- Metering Stations
- Field Manifolds and Collectors
